Pueblo River Trails Extension Master Plan Update

Board of County Commissioners Work Session

October 12, 2021

- Update of the 1998 Pueblo River Trails Master Plan sponsored by CDOT
- Goal of the updated 20-year plan is to have a guide in place to inform future trail, expansion, access, and connectivity as the community grows
- Plan has been reviewed and accepted by CDOT
- Current planning process began in 2018 with public outreach and stakeholder engagement including four public open houses
- This was a planning effort to identify and prioritized trail connections that are suitable for potential 1A funding
- A high-level planning recommendation has been made but there is still a lot of future work to develop a suitable first phase that ensures community access, connectivity, and safety.
